

ASI

***"Protect your assets, manage your time,
and meet your financial objective"***

AIRCRAFT MANAGEMENT

As a current or prospective aircraft owner we are proud to expose you to an elite level of asset management. We understand the investment that exists behind all aircraft purchases and we value both the owners' decision and need for protection while enjoying such a valuable acquisition. As a result we offer a highly skilled and knowledgeable Flight Department to oversee the maintenance and preservation of your aircraft. We will assess crew management and cost efficiencies, secure all safety, security, and FAA compliances, as well as handle all scheduling as needed for personal or professional usage. Furthermore, as a licensed Air Carrier company we can offer you the opportunity to offset ownership cost through charter revenue.

Our ability to meet, and exceed, your needs and expectations has helped establish ASI as a cornerstone in the aviation management industry. Through years of first class customer service, the safe operation of our air crew, and our exceptional maintenance team we have been entrusted with the privilege of managing executive business class jet and turboprop aircraft across the United States.

We look forward to the opportunity to work with you in developing an asset management program that suits your schedule, as well as your personal needs, and financial goals.

ASI

MANAGEMENT BENEFITS

ACCOUNT MANAGEMENT

The owner will be assigned an Account Manager who will provide monthly aircraft reports, communicate any needed maintenance or improvements, handle billing for any/all charter flights (if applicable), educate owner on any available tax benefits, and oversee secure storage in one of our state of the art hangars.

Additional benefits include full access to ASI's Charter Fleet, preferential insurance rates, and national fuel discounts.

PILOT STAFFING AND TRAINING

ASI will be responsible for the evaluation and assignment of qualified pilots to your aircraft, flight scheduling, record keeping, and pilot logs. Additionally, approach chart audits will be done on a bi-weekly basis, we will work to retain all FAA regulations and aircraft insurance requirements, and implement our certified Safety Management System.

DISPATCH TEAM

Our office personnel are available 24 hours a day and are responsible for all of your scheduling needs. These experienced individuals will make all of your travel arrangements including catering, airport usage, car rental, hotel accommodation, and any other personal travel detail. They also have the ability to secure reduced hangar and ramp fees for extended airport storage while at your desired destination.

MAINTENANCE SUPPORT

Once with ASI we will establish an aircraft/engine maintenance program which will track and record all aircraft activity, inspections, and service. The aircraft will also complete an FAA Conformity Inspection, whereupon it must meet FAR 135 requirements if it is to enter our Charter Fleet.

FINANCIAL FEEDBACK

Our company will compose monthly statements detailing all ownership expenses, handle Excise Tax deposits and reports, and communicate any other associated account activity.
